- Help index reviewed and enhanced

The screenshot displays the European Patent Register website interface. At the top left is the EPO logo and name in three languages. The main header includes the title 'European Patent Register' and language options (Deutsch, English, Français) with a 'Contact' link. A navigation bar contains links for 'About European Patent Register', 'Other EPO online s...', and 'Register Alert login'. Below this is a search bar with 'Smart search', 'Quick search', and 'Advanced search' tabs. A prominent red box highlights the 'Help' link in the navigation bar. The main content area is titled 'Help' and features a search input field with a 'Search' button. Underneath, there is a section for 'Online tutorial and Help topics' which includes an 'Online tutorial' link and a list of help topics such as 'Advanced search', 'Applicant', 'Boolean operators', 'Citations', 'Country codes', 'Date of filing', 'Date of publication', 'Default operators', 'EP application number', 'EP publication number', 'Federated register', 'International Patent Classification (IPC)', 'Inventor', 'Kind codes', 'Legal status', 'Limitations', 'List of legal events', 'Nested queries', 'Non-patent literature (NP documents)', 'Opponent', 'Patent family', and 'Priority date'.

Register Events Print

↓ Events (XML)

A Register event is a procedural action (taken by any party to the proceedings) involving a coding (addition, deletion, change of data) that triggers an entry in the European Patent Register. This entry adds a **Most recent event** in **About this file** and is also reflected in **Event history**. For the purposes of monitoring applications, these events generate an e-mail notification to Register Alert users.

Certain actions to a file do not trigger a Register event. These include addition of documents to **All documents** (file inspection), change in file status and certain actions in the appeal procedure.

Below you will find a list of selected procedural actions that trigger Register events. For a list of all events, click **Events (XML)** above.
